LearnHub

Complete Platform Feature Plan

Course discovery • Enrollment • Learning • Referrals • Trust

A product and audience-experience blueprint for a training institute serving college students, career switchers, and working professionals.

Platform purpose

Help learners discover a suitable course, understand the teaching approach, enroll confidently, and manage their learning in one place.

Scope of this plan

This document describes the intended platform features and release priorities. It is a build plan, not a claim that every feature already exists. Technical stack and implementation instructions are excluded.

Core journey

Explore a course > view syllabus and sample teaching > choose a batch > enroll or request assistance > attend classes > complete practical work > receive eligible certification > refer others.

Contents

- 1. Audiences and platform principles
- 2. Course categories and formats
- 3. Subjects and learning paths
- 4. Course pages and curriculum content
- 5. Public website and visibility
- 6. Accounts, enrollment, and payments
- 7. Student learning dashboard
- 8. Student and partner referrals
- 9. Chatbot and human support
- 10. Credibility and student outcomes
- 11. Staff operations and reliability
- 12. Release priorities and success measures

Audiences and platform principles

Build a broadly useful platform with clear entry points for different learners.

Audience	Needs and visible information
B.Tech and college students	Practical skills, projects, coding preparation, and schedules compatible with college. Show prerequisites and what learners will build.
Career switchers	Beginner-friendly entry points, a progressive learning path, manageable commitments, and realistic outcomes. Explain support for learners from other fields.
Working professionals	Weekend or evening batches, focused certifications, advanced subjects, and clearly stated weekly practice requirements.

Platform principles

- Allow visitors to browse courses, syllabi, prices, instructor profiles, and sample lessons without signing in.
- Require sign-in for enrollment, purchase, and private student dashboard access.
- Use simple navigation and clear actions: Explore Courses, Book a Demo, Enroll, and Ask a Question.
- Explain who each course is for and who may need a foundation course first.
- Support global visitors with country selection, teaching language, explicit timezones, and local-time class display.
- Make mobile browsing, keyboard access, readable text, and accessible forms part of the core experience.
- Offer only services the institute can deliver consistently. Publish clear support arrangements and realistic outcomes.

Course categories and formats

Use three main program categories, with subject and delivery format tracked separately.

Category	Purpose and suggested structure
Intensive programs	Focused skill development over approximately one month. Frequent classes, assignments, and a final practical project.
Short-term courses	A specific subject or tool with flexible duration. Include weekend, winter, summer, workshop, and focused certification batches.
Long-term programs	Multi-month foundations and specialization. Regular live classes, structured practice, and several projects; one-hour or 90-minute classes where offered.

Separate the course from its batch

- Course: title, subject, syllabus, learning outcomes, prerequisites, and certification requirements.
- Batch: start/end dates, weekdays, class time, timezone, instructor, mode, seats, and enrollment availability.
- Formats: live online, classroom, hybrid, weekend, evening, and seasonal.
- Allow multiple batches for the same course without duplicating the syllabus.
- Make duration, teaching hours, class frequency, and schedules editable rather than fixed globally.

Example listing

Python with Machine Learning | Long-term program | Beginner to intermediate | Live online | Evening batch

Course availability

Clearly show upcoming, open, full, closed, or cancelled batches. Provide a waitlist or inquiry option when enrollment is unavailable.

Subjects and learning paths

Start with subjects the institute can teach well and expand with proven demand.

Subject group	Possible courses
Programming foundations	Python, JavaScript, Java
Web development	HTML/CSS, React, Node.js, full-stack development
Data and AI	Python for Data Science, SQL, Machine Learning, Data Science and AI
Data engineering	PySpark, Snowflake
Cloud and deployment	Cloud fundamentals, Azure, deployment fundamentals
Interview preparation	Python DSA, coding practice, technical interview preparation

Guided learning paths

- New to programming: Python foundations > guided projects > choose a specialization.
- B.Tech student: programming > DSA > development projects > interview preparation.
- Career switcher into data: Python > SQL > data analysis > machine learning > portfolio projects.
- Working developer: assess existing skills > choose focused advanced courses > apply skills in a project.

Path information

- Show prerequisites, recommended sequence, approximate effort, and skills gained at each stage.
- Link each stage to real available courses and batches.
- Allow learners to compare a standalone course with a longer program.
- Describe career relevance accurately without promising employment or a guaranteed salary.

Course pages and curriculum content

Every page should answer: Is this suitable for me, what will I learn, how will classes work, and what am I paying for?

Identity and suitability

- Title, poster, overview, category, subject, skill level, and intended audience.
- Prerequisites, required tools, prior knowledge, and a suggested starting point for beginners.
- Specific learning outcomes and practical skills.

Curriculum and teaching

- Detailed syllabus organized by modules, topics, and learning sequence.
- Teaching hours, duration, weekly practice expectations, and teaching language.
- Delivery mode, live class format, instructor profile, and sample lesson.
- Assignments, assessments, practical projects, instructor feedback, and doubt support.
- Recording availability and access period, where included.

Batches, fees, and certificates

- Upcoming batches, start dates, schedules, explicit timezone, capacity, and availability.
- Complete fees, included services, payment options, and applicable refund terms.
- Certificate issuer, completion requirements, assessment criteria, and eligibility.
- Distinguish institute completion certificates from external professional certifications.

Actions and supporting content

- Enroll, Book a Demo, and Ask About This Course buttons.
- Downloadable syllabus, relevant FAQs, course comparison, and shareable links.
- Real project demonstrations and relevant approved learner stories.

Public website and content visibility

Help a new visitor understand the institute and reach the right course quickly.

Homepage order

- Clear introduction with Explore Courses and Book a Demo.
- Intensive, short-term, and long-term category cards.
- Upcoming batches and promotional banners linked to the relevant course.
- Learning paths for college students, career switchers, and professionals.
- Sample teaching, project demonstrations, and instructor profiles.
- Verified learner stories, FAQs, and contact options.

Public pages

- Home; course catalog; course details; learning paths; student stories; instructor profiles.
- About the institute; contact and inquiry; demo booking; events or workshops.
- Articles and beginner guides; privacy, terms, refund policy, and referral terms.
- Enrollment and payment confirmation pages with appropriate access protection.

Discovery and sharing

- Search by course name, subject, or keyword.
- Filter by category, subject, level, duration, fee, language, delivery mode, schedule, and upcoming availability.
- Compare courses by outcomes, prerequisites, duration, support, and price.
- Use individual shareable course and batch links with accurate preview text and imagery.
- Publish helpful educational content with clear titles, readable course descriptions, and updated dates.
- Keep banners concise, images optimized, and mobile actions easy to find.

Accounts, enrollment, and payments

Keep enrollment simple while collecting the information needed to support each learner.

Accounts

- Google sign-in and email-based registration; email verification and account recovery.
- Student profile, contact details, learning interests, and notification preferences.
- Separate student access from staff permissions.

Enrollment journey

Explore course > choose batch > sign in > confirm student details > apply an eligible code > pay or request assistance > receive confirmation.

Collect initially	Optional or collected later
Name, email, phone, country/timezone, course and batch	College, degree/year, employment status, learning goals, existing skills
Enrollment consent and applicable payment consent	Referral code, additional message, and marketing preferences

Enrollment and payment features

- Book a demo or request a callback before purchasing.
- Show the complete payable amount, currency, inclusions, and policy links before confirmation.
- Validate referral and discount eligibility and explain whether they can be combined.
- Provide verified payment confirmation, enrollment reference, receipt, and payment history.
- Handle failed or pending payments, retries, cancellations, and refund requests.
- Prevent duplicate submissions and overbooking; explain when a selected batch becomes unavailable.
- Keep enrollment status and payment status separate. Share private records only with authorized users.

Student dashboard and learning

Give enrolled students one place to access their classes, work, progress, and support.

Learning access

- My courses and enrolled batches.
- Upcoming classes, timezone-aware schedule, and eligible class access links.
- Announcements, class changes, reminders, and learning materials by module.
- Recordings where included, with a visible access period.
- Downloadable notes, practice exercises, and project instructions.

Practical work and progress

- Assignments, submission deadlines, submission history, and status.
- Instructor feedback and project review.
- Quizzes, assessments, course progress, and attendance where relevant.
- Course discussions and doubt support.
- Certificates only after the published completion requirements are met.
- Certificate verification using a unique reference, with limited public information.

Account and support

- Enrollment details, payment history, and receipts.
- Support requests with status and response history.
- Referral links, referral progress, and earned rewards.
- Notification preferences and profile updates.

First-release focus

Prioritize class access, materials, assignments, announcements, and support. Add detailed analytics and more advanced learning features after these workflows are reliable.

Student and partner referral programs

Use separate programs for learners and external promoters, with transparent eligibility and reward rules.

Program	Participants and reward approach
Student referral	Eligible learners or registered students. Offer a defined course credit, discount, or reward.
Partner referral	Approved alumni, campus ambassadors, creators, or partners. Commission follows published partner terms.

Student referral features

- Unique referral code and shareable link; easy sharing through WhatsApp and other channels.
- Optional benefit for the referred learner, clearly shown before enrollment.
- Attribution recorded during enrollment under a published rule.
- Dashboard statuses: pending, qualified, rewarded, rejected, or reversed.
- Visible reward conditions, limits, expiry, and transaction history.

Partner referral features

- Partner application, approval, and dashboard.
- Referral links, approved promotional content, conversion tracking, and commission rules.
- Payout tracking and required payout details collected when needed.
- Admin review of exceptions and disputes.

Qualification and safeguards

A referral qualifies only after a valid paid enrollment and the applicable refund period. Define attribution duration, code precedence, permitted promotions, payout timing, and reward use. Handle refunds, cancellations, duplicate accounts, and self-referrals. Record reward approvals and reversals so balances remain explainable.

Chatbot and human support

Offer useful course guidance backed by approved information, with a clear route to a person.

Chatbot topics

- Course suitability, prerequisites, syllabus, and projects.
- Current batch dates, timezones, schedules, fees, and available seats.
- Teaching format, sample lessons, certificate requirements, and recording access.
- Demo booking, enrollment steps, payment options, and referral rules.
- Support arrangements and published refund procedures.

Reliable behavior

- Answer from approved institute content and current course information.
- Link to the relevant course, batch, or policy page.
- State when information is missing or uncertain and offer a human handoff.
- Never invent discounts, accreditation, placements, guarantees, or learner outcomes.
- Require authentication before discussing private student records.
- Collect callback information with consent and respect communication preferences.

Human communication

- WhatsApp contact, inquiry form, callback request, and support tickets.
- Show support hours and realistic response-time expectations.
- Route course inquiries to counseling staff and learning issues to instructors or support.
- Track inquiry stages: New, Contacted, Interested, Enrolled, or Closed.
- Keep conversation and follow-up history available to authorized staff.

Credibility and audience confidence

Build trust through evidence of teaching quality, clear expectations, and genuine learner experiences.

Trust feature	What visitors can evaluate
Sample lessons	Teaching clarity and pace
Detailed syllabus	Actual topics, sequence, and depth
Real projects	Practical skills learners will build
Instructor profiles	Relevant experience and teaching responsibility
Approved learner videos	Genuine experiences and completed work
Certificate explanation	Issuer and completion requirements
Transparent fees and policies	Costs, inclusions, and conditions
Public institute contacts	How to reach and identify the organization

Student stories and reviews

- Ask learners to describe their starting point, course, project, and experience.
- Record permission for names, images, videos, and public stories.
- Publish accurate outcomes; label sample projects and promotional examples.
- Collect course reviews from enrolled learners and moderate abusive or irrelevant content.
- Use visible dates and keep course facts current.

Positioning

Emphasize live instruction, a clear syllabus, practical projects, feedback, and accessible doubt support wherever these are genuinely offered. Let prospective learners preview the experience before committing.

Staff operations and platform reliability

Give staff the tools to maintain accurate content, deliver classes, and resolve learner issues.

Management features

- Courses, categories, modules, syllabus, learning paths, and publication status.
- Posters, banners, articles, preview lessons, instructors, and public profiles.
- Batches, schedules, seats, class links, and announcements.
- Students, enrollments, inquiries, callbacks, and demo bookings.
- Payments, refunds, discounts, receipts, and referral rewards or payouts.
- Materials, recordings, assignments, feedback, assessments, and certificates.
- Stories, reviews, publication consent, support tickets, and chatbot knowledge.
- Institute branding, contact details, policies, and communication templates.
- Reports, safe data exports, and history of important staff actions.

Roles and access

Owner/admin: institute operations. Instructor: assigned batches and learning work. Support staff: inquiries and support. Student: own learning and records. Referral partner: own referrals and payouts. Limit each role to the information required.

Operational reliability

- Preserve enrollment and payment history when courses or batches are archived.
- Maintain backups and a recovery process; monitor service errors and failed communications.
- Protect private learner information and provide controlled media access.
- Keep uploads available across restarts and updates.
- Show clear loading, error, empty, and success states; support direct page links and a useful 404 page.
- Send confirmations and class-change notifications with retry handling.
- Keep payment, enrollment, learning progress, and referral statuses distinct.

Release priorities and success measures

Launch a focused experience, then expand learning and growth features in stages.

Release	Scope
First launch	Course categories and complete pages; posters; search; Google/email sign-in; inquiry and demo booking; enrollment; verified payments; essential student dashboard; staff management; genuine trust content.
Learning and growth	Assignments and feedback; recordings; progress; certificates; student referrals; grounded chatbot; support tickets.
Expansion	Partner referrals; moderated community or student forum; advanced reporting; additional languages/currencies; native mobile app if demand justifies it.

Website and application experience

Start with a responsive website and an installable web app experience. Maintain consistent course, enrollment, and student information across devices. Consider a separate mobile application after the core journey is established.

Launch readiness

- Replace sample content with approved fees, syllabus, schedules, and institute details.
- Verify course publishing, inquiries, enrollment, payments, class access, and support end to end.
- Confirm certificates and marketing statements accurately describe the offer.
- Publish final policies and referral terms; verify media permissions.
- Confirm staff permissions, recovery arrangements, and mobile usability.

Measure and improve

- Course-page visits and inquiry conversion.
- Demo bookings and attendance.
- Paid enrollments and payment failures.
- Attendance, assignment completion, and course completion.
- Support response and resolution times.
- Referral conversion and qualified rewards.
- Learner feedback and repeat enrollment.

Core promise: learners can understand the course, preview the teaching, enroll with confidence, and receive the support they were shown.
