FULL STACK DEVELOPER

Full Stack Developer with **2+ years** of hands-on experience in building scalable web applications using **JavaScript, React, Node.js**, and **Python**. Proficient in **responsive UI design, API integration**, cloud deployment (**Azure, AWS, Google Cloud**). Experienced in optimizing performance, implementing **CI/CD** pipelines with **Azure DevOps, Git**, and **Docker**, and ensuring seamless cloud-based deployments.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, C++
Backend: Spring Boot, Node.js, Express.js, RESTful APIs, GraphQL
Frontend: React.js, Redux, HTML5, CSS3, Tailwind, Material UI, Bootstrap, Angular (Basics)
Databases: MongoDB, PostgreSQL, Redis, Firebase, SQL
Cloud/DevOps: Azure (App Services, CI/CD), AWS (EC2, S3, Lambda, RDS, VPC), Docker, Kubernetes, Jenkins, Git, GitHub, GitLab
Testing: JUnit, Mockito, Jest, Cypress, Postman, TDD/BDD principles
Other: OAuth/JWT Auth, Responsive Web Design, Agile/Scrum, Microservices

EXPERIENCE

LTIMindtree

Sept 2023 – Present

Full Stack Developer

Pune, Maharashtra

- Architected, developed, and deployed **10+ enterprise-grade web applications** using **React.js, Node.js, and Express.js**, hosted on **Azure App Services** with **99.9% uptime** and enhanced deployment efficiency by **35%**.
- Designed and implemented **RESTful and GraphQL APIs** to handle complex data transactions, boosting response times by **30%** and ensuring scalable microservice communication.
- Integrated secure authentication using **OAuth 2.0** and **JWT**, enabling role-based access control and improving user data protection in compliance with organizational security standards.
- Implemented automated **CI/CD pipelines** using **Azure DevOps, Docker, and Git**, reducing manual deployment overhead by **40%** and ensuring zero-downtime releases.
- Optimized backend performance by leveraging **caching (Redis)** and asynchronous event handling, reducing API latency and improving throughput for high-traffic systems.
- Collaborated with UI/UX designers and DevOps teams in an **Agile Scrum** environment to deliver high-impact product features, achieving **15% fewer post-release defects**.
- Configured and monitored **Azure resources** (App Services, Blob Storage, Function Apps) and implemented environment-based configuration for staging and production workloads.
- Enhanced observability and debugging using **Application Insights, Log Analytics, and PowerShell scripts** to automate maintenance tasks and system health checks.

PROJECTS

JobSymple | Node.js, Express, React, MongoDB

GitHub

- Developed a full-stack job portal using MongoDB, React.js, and Node.js, hosted on **Vercel** for scalable deployment
- Built admin/recruiter panel for posting and managing jobs, and candidate login with **JWT** authentication for secure applications
- Implemented **RESTful** APIs and role-based access control to separate recruiter and candidate features.
- Designed a responsive UI with React.js and Tailwind CSS, improving usability and reducing page load time

Decentralised Voting Using Blockchain | Solidity, web3.js, React.js, Smart Contracts

Github

- Engineered a decentralized voting dApp using **Solidity** smart contracts, **React.js** frontend, **Web3.js** blockchain communication, **Truffle** framework, and **Ganache** for local blockchain simulation.
- Designed and implemented **Ethereum smart contracts** for election creation, voter registration, candidate management, and secure vote transactions.
- Integrated **Metamask** wallet authentication for seamless Web3 login, account management, and on-chain transaction processing.
- Built a responsive UI using **React Hooks, CSS Flexbox/Grid**, and **Smart Contract** Event Listeners to update voting results in real-time without page reloads

EDUCATION

Lovley Professional University

Bachelor of Technology in Computer Science and Engineering

July. 2019 – July 2023

Jalandhar, Punjab
